Operation Guidelines

Turn On/Off:

Five clicks on power button to turn on or off.

Fill Oven:

Unscrew mouth tip, pack materials into chamber, then replace mouth tip.

Temperature Adjustment:

Press + / - button to select the temperature.

Temperature Lock / Unlock:

Press + / - button at the same time for three seconds to enter into setting mode, and choose Lock/Unlock function. Then press the power button to confirm the setting.

Heating Model Setting:

Press +/- button at the same time for 3 seconds to access Inspire menu, then chose proper heating model (Fast/Medium/Slow). Press the power button to confirm your setting.

Vaping Time Setting:

Press +/- button at the same time for 3 seconds to access Inspire menu, then chose proper vaping time (between 3-9 minutes). Press power button to confirm your setting.

Water bubbler:

In order to use the bubbler turn it upside down, then add water. Do not overfill. After adding water reverse the bubbler back, and suck on the mouthpiece one time in order to prevent water from leaking.

Special Notices:

Please make sure water is not leaking out of the bubbler before attaching it to the vaporizer, nor should you blow back into the bubbler. Both these actions may cause damage to your vaporizer.

LED indicator:

Red: Hold the power button for 3 seconds until it lights up red. This indicates that the Inspire is now heating.

Blue: When fully heated the light will shine blue. You may now begin your vaping session. (If you don't touch any of the Inspire buttons within 3-9 minutes when it is in vaping models, it will turn off automatically. If you want to use other vaping models please turn on Inspire and use it again).

Charging

Charge your Inspire vaporizer for 3 hours. The OLED display will show the battery status, when it is fully charged take off the charging cable. You can also take the battery out of your Inspire and charge it with your 18650 charger.

Tips

For best vaping experience, please do not overpack the heating chamber with your materials. This will ensure easy air flow passage for even heating. In the case that vapor is not being released, use the packing tool to gently stir the product within the chamber.

Clean Heating Chamber: use the brush tool to gently clean the walls of the heating chamber.

Clean the Filter: use a paper clip or a pin and insert within the holes. Push all the way through to ensure clear airway, then wipe clean with a cloth.

Clean the Mouthpiece: Use a cotton swab and wipe the inner part of the mouthpiece then wipe with a damp paper towel.

When you finish your vaping cycle turn off the device and place in a secure location.
